Voice 22 Loudspeakers

At Simaudio, we are proud to announce that for the first time, it is possible to own a complete MOON system, from the source all the way to the loudspeaker. The MOON Voice 22 loudspeaker completes the realization of our dream to offer an all-MOON music system with our own voice.

The Voice 22 loudspeaker delivers the renowned rich and natural signature MOON sound with a precise clarity that will delight any music lover. The wide soundstage allows every small detail to flourish and for the deep, clean bass to expand.

The enclosure employs a unique patent-pending technology called CGD (Curved Groove Damping) to control the panel resonances of the loudspeaker. Strategically placed braces control panel resonances, and a sculpted groove filled with damping material runs through the interior walls. This makes the lengths between edges different at any point on the surface, limiting panel resonance and improving the sound, free from cabinet coloration. The bass extension and definition are extremely impressive and enjoyable, especially for such a compact loudspeaker.

The Voice 22 is the perfect fit for all systems, especially those in the MOON 200 – 300 ranges.

From now on, immerse yourself in the ultimate MOON sound experience!

Specifications

Tweeter : 29mm soft dome with waveguide

Woofer : 155mm mineral-filled polypropylene cone

Sensitivity : 89dB/2.83V/1m

Nominal Impedance : 6Ω

Recommended Power : 50W – 150W

Frequency Response (±3dB) : 55Hz – 24kHz

Frequency Range (-6dB) : 45Hz – 30kHz

Crossover : 1.5kHz

Dimensions (W x H x D) : 20cm x 35cm x 29cm

Weight : 10.5kg
